INTERNATIONAL CONFERENCE ON LITHIUM-SULFUR BATTERIES

JUNE 28 – JULY 1, 2021 | ONLINE CONFERENCE

**ICLSB
2021**
DRESDEN, GERMANY

Dear battery community,

Lithium-sulfur batteries are the most promising choice for future energy storage systems. Recent prototype cells reveal the potential for ultra-high specific energy: Novel materials are crucial to significantly enhance and tailor the cell performance for specific applications.

The International Conference on Lithium-Sulfur Batteries (ICLSB) is providing the platform for presenting the latest results, new materials, processes and applications in the field of lithium-sulfur batteries. Following the great success of the first edition of this conference series 2019 in Beijing, China, the second ICLSB is being organized by Fraunhofer IWS, an established center for lithium sulfur battery development in Germany.

Prof. Dr. Stefan Kaskel
General Chair ICLSB 2021
Fraunhofer IWS Dresden, Germany

Our general topics

- Li-S technology in context of other next generation battery developments
- Trends in material development for Li-S technology
- Cell development and applications of Li-S technology

Call for abstracts

You are highly welcome to present your latest research results with a lecture or a poster presentation. Please submit a brief summary of the planned contribution addressing one of the conference topics. The one-page abstract should be written in English, including title, author(s), affiliation(s) of author(s), abstract text and references.

All contributions will be reviewed by the scientific committee. You will receive a notification whether your contribution has been accepted as an oral presentation or a poster. All accepted abstracts will be published in the conference proceedings.

Deadlines:

Abstract submission:	March 31, 2021
Notification of acceptance:	May 3, 2021

Sponsoring

As a sponsor of ICLSB 2021, you increase your visibility within the relevant target group and secure the attention of potential customers. Take advantage of this unique meeting place and present your products and services to the international battery community. For detailed information please visit the conference website www.iws.fraunhofer.de/iclsb
